## Revision Booklet 5

## Topics

1. Time Speed \& Distance
2. Density, Mass \& Volume
3. Trial and Improvement
4. Angles in a Polygon
5. Surface Area \& Volume
6. Transformations
7. Probability

Name

1. A train travels at 102 m.p. h for 1 hour and 6 minutes. What distance will it travel in this time?
2. If a cyclist travels a distance of 7 miles in 23 minutes, what is the cyclist's speed?
3. How long will it take a plane travelling at 50 metres/second to travel a distance of 135 km ?
4. A block of gold has a mass of 1.4475 kg . Its dimensions are: length $=10 \mathrm{~cm}$, height $=2.5 \mathrm{~cm}$ and width $=3 \mathrm{~cm}$.

Calculate the density of gold in grams $/ \mathrm{cm}^{3}$.
5. Use trial and improvement to find the value of $x$ if

$$
x^{2}-2 x=5
$$

| Try | Calculate | Comment |
| :--- | :--- | :--- |
|  |  |  |
|  |  |  |

|  |  |  |
|  |  |  |
|  |  |  |
|  |  |  |
|  |  |  |
|  |  |  |

6. Use trial and improvement to find the value of $x$ if

$$
\sqrt{x}+x=9
$$

| Try | Calculate | Comment |

|  |  |  |
|  |  |  |
|  |  |  |

8. Calculate the volume and surface area of a cuboid that has the following dimensions length $=10 \mathrm{~cm}$, height $=2.5 \mathrm{~cm}$ and width $=3 \mathrm{~cm}$.

9. Calculate the surface area and volume of a cone with a height 4 cm , base radius 3 cm and slope length 5 cm .

10. Calculate the surface area and volume of a sphere with a diameter of 20 cm

11. A hemisphere is the name for half of a sphere. What is the total surface area of a hemisphere with a radius of 10 cm ?

12. 

The linear scale of a model bus is $\frac{1}{4}$ of the real bus. If 2.5 litres of paint is required to paint the model, how much paint is needed to paint the real bus?
13. Using point $P$ as the centre of enlargement, enlarge the rhombus by a scale factor of 3 .

14. The probability of rain is $15 \%$ in London and $28 \%$ in Manchester. Using a tree diagram, calculate the probabilities of
a. Rain in London and Manchester
b. Rain in London or Manchester

|  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |
|  |  |  |  |  |  |  |  |  |  |  |

15. On the grid above, draw triangle $A B C$ with $A(4,5) B(4$, $10)$ and $C(7,5)$.

- Rotate this triangle $180^{\circ}$ about the point $(11,5)$ and label this triangle $A^{\prime} B^{\prime} C^{\prime}$.
- Reflect $A^{\prime} B^{\prime} C^{\prime}$ in the line $y=8$ and label this reflected triangle $A^{\prime \prime} B^{\prime \prime} C^{\prime \prime}$.
- Reflect $A^{\prime \prime} B^{\prime \prime} C^{\prime \prime}$ in the line $x=11$ and label this reflected triangle $A^{\prime \prime \prime} B^{\prime \prime \prime} C^{\prime \prime \prime}$
- What translation maps $A^{\prime \prime \prime} B^{\prime \prime \prime} C^{\prime \prime \prime}$ onto $A B C$ ?
