Unit 5. Naming Numbers

National Curriculum Requirement

Read and write numbers to at least 100 in numerals and in words

Notes

Being able to use the correct words to describe numbers is an important skill. One would hope, for example, that when the word, ‘fifty-one’ was spoken that pupils could describe this using the numerals 51. It would also be useful if pupils could write the numbers in words, although one would not expect all pupils to be able to spell the words correctly. It would, in fact, be possible for a pupil to be unable to spell any of the words describing numbers correctly but be good at mathematics. This does not, however, mean that it is not necessary for pupils to start making attempts at writing down the numbers in words. It is probably best done as a fun type activity - making posters, etc, and these could be used to complement the following exercise.
