Unit 8. Adding and Subtracting a Two Digit Numbers and Tens

National Curriculum Requirement

Add and subtract a two-digit number and tens

Notes

Adding and subtracting tens and a two digit number enables pupils to clearly identify that they are adding or subtracting the tens part of a number. The process represents an extension of dealing with a pair of a one digit and two digit number. Pupils need plenty of practice in ensuring that respective units are used. The following work, we hope, gives a staring point for this.
