Unit 19. Comparison of Size

National Curriculum Requirement

Compare and order lengths, mass, volume/capacity and record the results using >, < and =

Notes

Pupils will probably need some physical objects to help with their comparison and a table of the relationship between units would also be helpful. The work sheet will, we hope, make a starting point for discussion of the magnitude of units and practice in using the <, > and = signs.

Comparing the Sizes

Write in one of the signs <, > and = between the two values to make the comparison of the two sizes correct. The first three have been done for you to give you the idea.

2 kilograms > 1500 grams

100 cm = 1 metre

2 millilitres < litre

1 metre 15 centimetres

1 kilogram 1000 grams

60 grams 1 kilogram

2 centimetres 1 metre

100 centimetres 1 metre

12 litres 10 millilitres

4 metres 1 kilometre
