Unit 29. Shapes in Everyday Objects

National Curriculum Requirement

Compare and sort common 2-D and 3-D shapes and everyday objects

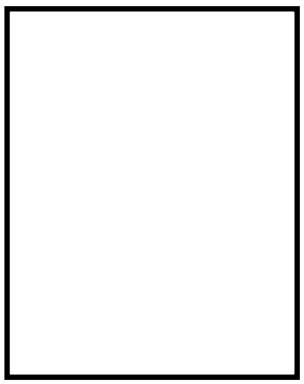

Notes

The pictures on the last page are 2-D pictorial representations of 3-D shapes and this, together with the convention that dotted lines show hidden edges, will need to be explained to pupils. The common geometric shapes can be seen in all manufactured objects and it is well worth spending time enabling pupils to identify these which is a really good exercise in applying mathematics in the ‘real world’.
